ABSTRACTS AND CURRENT PAPERS JOURNALS

Three main subject areas are covered by INSPEC abstracts and current papers journals: physics, electrical and electronics engineering, and computer and control engineering. For each field an abstracts journal and a companion titles journal are published. The abstracts journals are intended as library tools for retrospective information retrieval, whereas the companion titles journals, which omit the abstracts and associated indexes, are intended as low-cost current-awareness tools for the individual.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts, Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

ORDERING PROCEDURE

THE AMERICAS

North (including Canada), Central and South

All orders from the above areas, and orders from members of Institute of Electrical and Electronics Engineers Inc. anywhere in the world, should be sent to Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 445 Hoes Lane, Piscataway, N.J. 08854, USA.

REMAINDER OF THE WORLD

All remaining subscriptions should be sent to INSPEC Marketing Department, IEE, Savoy Place, London WC2R 0BL, England. Telephone 01-240 1871, Telex 261176, Telegrams Voltampere London WC2.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are 73 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

These are produced, containing all the information included in the INSPEC publications. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

KEY ABSTRACTS

A SOLUTION TO YOUR READING PROBLEMS

Starting in July 1975 — low cost Key Abstracts — selected each month from over 2000 journals, technical papers, conference proceedings, dissertations, books and patents from all over the world.

Complete coverage of the worlds most significant literature.

To start you can choose from one or more of the following six titles:

Power Transmission and Distribution
Industrial Power and Control Systems
Systems Theory
Communication Technology
Electronic Circuits
Solid State Devices

Approximately 250 articles will be covered each month. Each reference will contai

Title, Author's name and affiliation.
Source of the paper (including full bibliographic details).
A concise abstract.

enabling you to select those articles of most significance to you.

Complete copies of the articles described can be obtained from your own library or from the Library, United Engineering Centre, 345 East 47 Street, New York, NY 10017, USA, or the British Library, Lending Division, Boston Spa, Wetherby, Yorkshire, England.

SPECIAL PRICE	IEE and IEEE members	$19.50	£8 per year/sec
